MONACO INTERNATIONAL DIPLOMATIC & MEDICAL REFERRAL LETTER

Accredited Holder: GENILSON RODRIGUES | **Operational Seal:** THIERRY | **Issuance:** 15/10/2026 às 05:36:33 UTC
Hosting Jurisdiction: Associated High-Complexity Centers (Monaco / Geneva / Zurich)

SYSTEM OVERVIEW & ENTERPRISE ARCHITECTURE

Thierry Technology Concept Global is an enterprise-grade software infrastructure engineered for high-precision facial biometrics, contactless tissue telemetry (rPPG), and secure reporting.
• *IP Protection:* Copyright and trademark registered with INPI (Brazil) and protected under the Berne Convention.
• *Commercial Model:* Exclusive B2B Commercial Licensing (Setup + Recurring). 100% proprietary source code.

TECHNICAL SUMMARY & GOVERNANCE GLOSSARY

Sections: 01. Declaration | 02. Telemetry | 03. Guarantees | 04. Council Seal.
Glossary: • *rPPG:* Remote optical sensing. • *Facial Mesh:* 3D geometric mapping. • *SHA-256:* Cryptographic custody.

01 // GLOBAL REFERRAL DECLARATION & DIPLOMATIC STATUS

To Whom It May Concern:
This instrument formally endorses the three-dimensional biometric audit and tissue telemetry conducted under the rigorous standards of the *Thierry Technology Concept Global* ecosystem, ensuring full therapeutic continuity and oxidative stress protection alongside associated medical centers (**UHNW Standard**).

02 // BIOMETRIC AUDIT PARAMETERS & TISSUE TELEMETRY

Parameter	Reading	UHNW Status
Peripheral Tissue Oximetry (SpO2)	**98.5%**	Nominal / Optimized
Diaphragmatic Rhythm	**14 RPM**	Stable / Synchronized
UV Photoinduced Index	**Moderado/Alto** (28.5 °C)	Safe Exposure

03 // RECEPTION GUIDELINES & SHA-256 HASH

Instructions: Priority care and absolute medical secrecy (Switzerland/Monaco).
SHA-256 Hash: `AB9C9DDA0E7416BC6A8FF4DEB102429C91EBD3AF3172C8FD3EC9AF23E2EB7C3E`

04 // SOVEREIGN COUNCIL SEAL

Approved and sealed by the Thierry Technology Concept Global Sovereign Council. [**Status Locked @ 100% Green**]

PARECER	O processamento contínuo dos sensores bioambientais integrados à rede neural do Apex Protocol revela um quadro de alta resiliência homeostática e biofuncional. As variáveis microclimáticas capturadas registram temperatura ambiente de 27,0 °C associada a um índice de umidade relativa de 60,0%. Este balanço higrométrico nulo (fator 0,0) neutraliza perdas transepidérmicas hídricas severas (TEWL), proporcionando um ecossistema ideal para a preservação do manto lipídico.
